Tax Incentives	Increased tax incentive reduces effective home loan yields to 4.0% for a 9.4% home loan for first-time home buyers buying affordable houses

7 th Pay Commission	Annual payout to 10 Mn government employees to go up by ₹ 1 Tn per annum. Increased disposable income will have positive impact on the housing sector

Accelerating Urbanization	Urbanisation to rise to 40% of population by 2030 from the present 31%

Increasing Affordability

Amount in ₹ Mn

US \$ amounts are converted based on the exchange rate of US \$1 = ₹ 67
Affordability is defined as "Price of House" divided by the "Annual Income"

- Difference between rental yield and effective home loan interest rate is only 0.9%
- For only ₹ 1,800 (US \$ 27) per month more, a house costing ₹ 3 Mn can be purchased instead of renting it – a tremendous incentive to own a house and create real assets
- Effective home loan rate expected to slip below rental yield by FY18 spurring demand
- Tepid property price appreciation combined with wage inflation pushing up affordability

Mortgage Market Growth

Growing HFC Market Share in a Steadily Expanding Home Loans Market

High demand growth driven by:

- Reducing interest rates compressing the gap between effective home loan rates (after tax benefits), and rental yields, make house purchase increasingly compelling in comparison to renting
- Rising disposable incomes coupled with low effective interest rates (after tax benefits) is resulting in steadily increasing affordability
